

IECA Webinar Outline

UNDERSTANDING AND IMPLEMENTING THE NPDES MULTI-SECTOR GENERAL PERMIT AND 2020 EPA PROGRAM

Instructor: Nathan Collier CPESC, CESSWI, POWER Engineers Inc.

Recorded Date: Wednesday, February 6, 2020 | 12:00 – 1:00PM Central Time

The NPDES Multi-Sector General Permits (MSGP) regulate industrial activity by SIC codes and cluster industry types into groups called “Sectors.” Many different Sectors of industrial activity are covered by the MSGP and environmental objectives may change somewhat depending on the regulated sector. In addition, individual states may have specific requirements beyond those outlined in the EPA MSGP. A Stormwater Pollution Prevention Plan (SWPPP) must be prepared for a permitted facility to outline compliance obligations and to prescribe site-specific BMPs that address on-site pollutant sources and activities. Stormwater compliance is dynamic and updates to the SWPPP to reflect on-site conditions or changes to the current MSGP in effect must be taken into consideration. Any changes made during the renewal of the EPA MSGP will impact state permits during their next renewal. This webinar will provide a national-level overview of MSGP applicability and compliance for industrial facilities, including obtaining permit authorization and general SWPPP preparation, a discussion of ongoing MSGP compliance requirements, and potential changes to the 2020 EPA MSGP.

Learning Objectives:

1. Obtain knowledge on MSGP applicability and obtaining coverage.
2. Discuss ongoing MSGP compliance requirements, including SWPPP updates, inspections, monitoring, and corrective action requirements following monitoring and inspections.
3. Learn about potential changes to the EPA MSGP for the 2020 renewal.

Professional Development Hour Credit: 1 PDH

RCEP Delivery Method Type: Distance Learning – Asynchronous (Recorded IECA Webinar)

Category of the Activity: (1) Core Technical Content
